Repository Information

Respository's URL: https://github.com/Abhi-gupta21/Abhi-gupta21.github.io

This is a private repository for Abhishek to store all code from the course. The organization of this repository is as follows.

Indivisual Project-1 report -

Overview - In this project, I have used HTML, CSS, JS, JQuery and Bootstrap to create my own web portfolio.

outcomes - HTML, CSS, JS, JQuery, how to use API's, Bootstrap.

My website - Abhi-gupta21.github.io

my github repo - https://github.com/Abhi-gupta21/Abhi-gupta21.github.io

task 1 - created a repo by the name Abhi-gupta21.github.io, I used Iframe to include my resume. I have used Bootstrap for the nav bar and other layouts.

task 2 - created a link to waph.html using anchor tag

task 3 - The open source template I used is Bootstrap

task 4 - I included a page tracker from flagcounter.com, where i has to sign up and get the code.

I used JS code to install analog, digital clock, used jQuery for the joke of the day and also was able to alert "thank you for downloading my resume" when the link is clicked.

Integrated weather api and joke api using jQuery

used JS code given in the class with a little update for the cookies.
